feedback_economic_prosperity: Consideration should be given to attracting small and medium businesses to the area of land designated for industrial use in Tarbolton. Successive local authorities have singularly failed to attract any business to this area and I believe have ignored the potential and benefits an occupied industrial area would have to the immediate community. Businesses which could be attracted could complement the existing industrial development at Prestwick Airport Industrial Park.

feedback_future_communities: Many objections were forwarded to South Ayrshire Council about their failure to zone land for housing in Tarbolton. The lack of a choice of housing in Tarbolton is having many detrimental impacts on the community, including depopulation, falling school roll etc. South Ayrshire Council Planning Department appear not to be too bothered with this situation and have offered no solutions.

feedback_land_investment: See above!

feedback_transport: Nationalise and subsidise transport and utilities.

feedback_green_future: More investment in wind and wave power and small scale environment friendly systems (wind powered generators for farms and isolated houses)

feedback_rural_ayrshire: Ask the people who live in the rural areas. Do not take advice from town planners who work on the premise that what they produce is the best it can be, excluding and ignoring advice and experience of the people of rural areas. For too long particular rural areas have been treated with apathy. All strategic planning is directed towards the improvement of the main population areas. To avoid conflict, a solution would be to depopulate all communities with a population less than 5000 and move the people into the major towns!!!
