Subject: AYRSHIRE JOINT STRUCTURE PLAN 2025

Dear Sirs,

I refer to your letter inviting responses from parties who would be interested in being included in the consultation for the new Ayrshire Joint Structure Plan 2025.

ScottishPower has a significant landholding in Ayrshire with offices, substations, the electricity transmission and distribution infrastructure and is becoming increasingly involved in the development and connection to new wind farm developments in order to meet the targets laid down by the Scottish Executive on renewable energy.

ScottishPower would like to be included within the consultation process in order to assess the impact of policies on existing infrastructure and to new infrastructure over the life of the new structure plan.

We look forward to hearing from you.

Regards,

Ross
